## NEWS

### A message from our directors, Martin Churchley and Paul Walker

"The virus outbreak and lockdown has been a difficult time for all businesses and extremely challenging financially. However, here at First Light Lamps, we have chosen to take a very positive outlook for the future.

Even in these times of hardship there sits opportunity, in order to take advantage of these opportunities, we have been investing heavily in developing our business. For many years First Light's reputation for producing high performance lamps at competitive prices has grown massively. Our only problem has been to keep up with demand!

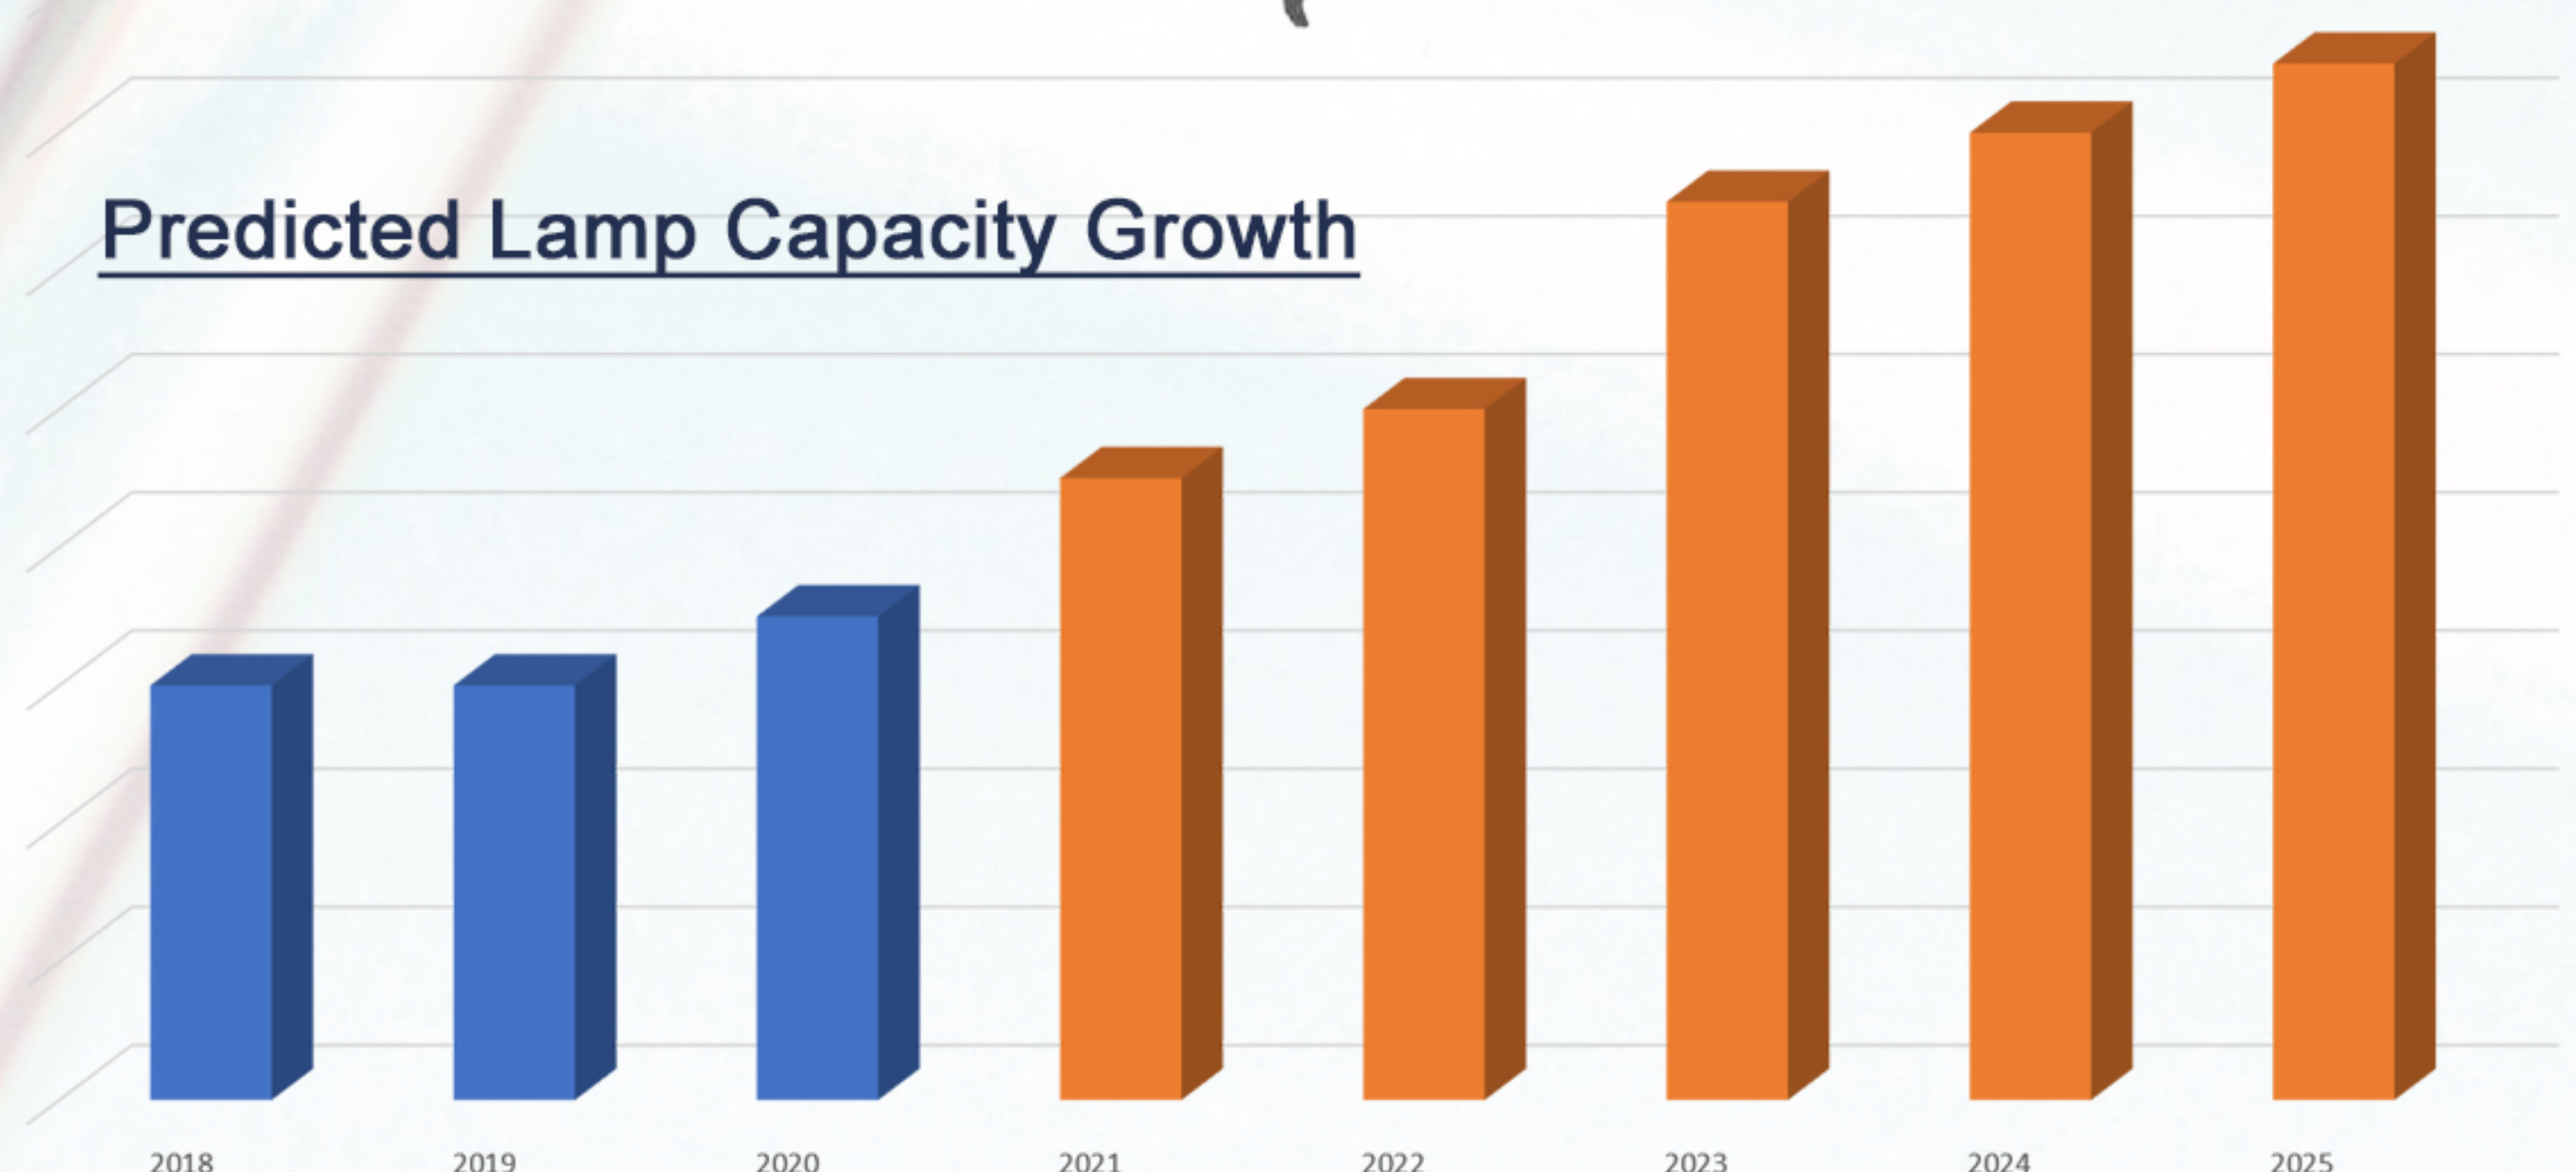

Since the beginning of 2020 we have taken steps to address this. Step one involved increasing our manufacturing area by 20% and recruiting highly skilled Engineers covering many key areas. The second step involved investing in advanced machinery to increase productivity and capacity.

We are at a very advanced stage with these projects now and only a matter of weeks away from launching the most advanced automated production line for flash lamps in the world. We will be well placed to support the market at all levels. We are very proud of our achievements and to be considered one of the leaders in our field.

We look forward to working with you."

Predicted Lamp Capacity Growth

#### Key advances:

- Most advanced automated production worldwide
- 40% increase in manufacturing capacity
- 20% increase in manufacturing area
- Greater productivity
- Enhanced engineering capability
